DESCRIPTION

Anders is a project manager, systems architect and senior developer with customer focus and many years of experience from the industry. He holds the **PRINCE2 Practitioner**, **PRINCE2 Foundation** and **Certified Scrum Master** certifications, and he has had the role of *scrum master* in several projects.

He also has experience as a teacher, which is useful when technical challenges are to be explained in a non-technical and jargon-free manner. He has also been mentor for new employees.

RELEVANT PROJECT EXPERIENCE

08.2018 – PRESENT (DELICHON)

ABB: Process Power Simulator
Senior Developer

The ABB Process Power Simulator used to simulate larger systems. It has tools for building, configuration and running models. It can also operate the models as in a local field environment by interacting with the equipment and create scenarios.

Some of the tools and technologies Anders used in this project were: *Akka.NET, TypeScript, React JS, Microsoft .NET Core 2.2, ASP.NET Core MVC, Keycloak, C#, Microsoft SQL Server*.

04.2018 – 08.2018 (SOPRA STERIA)

Norwegian Tax Administration: Intranet
Senior Developer / Architect

Anders worked with maintenance, development and documentation on an existing intranet solution called "the SKO portal". The solution was based on *Episerver CMS*. Anders contributed with training for the internal employees, and he created a set of recipes for simplifying the editors' daily work.

Some of the tools and technologies Anders used in this project were: *Episerver CMS, Microsoft .Net, C#, Microsoft SQL Server, Ajax, Javascript, Jira, Confluence, Git, Octopus Deploy*.

05.2016 – 08.2017 (CGI)

ASKO: Better Selling Commerce Website
Senior Developer

ASKO is Norway's largest grocery wholesale, and the project aimed at creating a new B2B portal that would be both more user friendly and also selling more products through better recommendations.

Anders was responsible for installing the *inRiver PIM* system into the solution, optimizing it and develop integrations between the *inRiver PIM* system and the customer's various internal systems. He was also responsible for performance testing of the solution using *jMeter* and *Blazemeter*. Anders developed an authentication system based on *IdentityServer3* for handling logins.

Some of the tools and technologies Anders used in this project were: *Episerver CMS, Episerver Commerce, inRiver PIM, Microsoft .Net, C#, Microsoft SQL Server, REST Services, PowerShell, WebAPI, WCF, IdentityServer3, Jira, Confluence, TFS, Git, Octopus Deploy*.

2015	**Lead Enterprise Architect Programme (LEAP)** *Microsoft*

Fellesforbundet: New Public Website
Senior Developer, Team Lead, Scrum Master, Mentor

Fellesforbundet is one of Norway's largest trade unions.

Anders was responsible for planning and estimation of the solution, and also for coordinating the work between the developers on the team, and for keeping the customer updated about the progress. Anders participated hands-on in development of the solution, which was based on textitEpiserver CMS.

One of the developers came straight from college, and Anders was assigned the role as mentor, teaching the new employee about *Episerver CMS* and also about the various internal systems at CGI.

Some of the tools and technologies Anders used in this project were: *Episerver CMS, Microsoft .Net, C#, Microsoft SQL Server, REST Services, PowerShell, WebAPI, Jira, Confluence, TFS, Octopus Deploy.*

03.2014 – 05.2015 (CGI)

Tekna: New Public Website
Senior Developer, Team Lead

Tekna is a trade union for technical and scientific professionals.

The project consisted of two sub projects, a CMS-project and a CRM-project. Anders was responsible for planning, estimation and coordination among the CMS developers. As a developer, Anders was responsible for the integration between the CMS and CRM projects.

Some of the tools and technologies Anders used in this project were: *Episerver CMS, Microsoft .Net, C#, Microsoft SQL Server, REST Services, PowerShell, WebAPI, Jira, Confluence, TFS, Octopus Deploy, NServiceBus, Knockout.js, Javascript, jQuery.*

08.2012 – 03.2014 (MAKING WAVES)

Stortinget: New Intranet
Senior Developer, Mentor

Anders was responsible for creating a solution gathering calendar events from some 30-odd calendars, letting end-users find their calendar information in a single place. He also was responsible for integrating *Episerver CMS* with the *IntelliSearch* search engine, and also for the integration between the new *Episerver CMS* solution and the *Sharepoint* solution that was developed in parallel.

During the project, Anders also fulfilled the role as mentor for two new employees.

Some of the tools and technologies Anders used in this project were: *Episerver CMS, Microsoft .Net, C#, Microsoft SQL Server, REST Services, PowerShell, IntelliSearch, TFS, Octopus Deploy, Making Waves ActivityFeed, Knockout.js, Javascript, jQuery, Jira, Confluence.*

02.2010 – 03.2011 (TARANTELL)

Synoptik: New public websites for Brilleland & Interoptik
Senior Developer, Team Lead, Scrum Master

Anders was responsible for the planning and development of two new web solutions based on *Episerver CMS*, but with as much code re-use as possible to keep the costs down.

Some of the tools and technologies Anders used in this project were: *Episerver CMS, Microsoft .Net, C#, Microsoft SQL Server, PowerShell, TFS, Octopus Deploy, Javascript, jQuery, FlusterMaps, Google Mini, Jira, Confluence.*

EDUCATION

2003 – 2004	**Secondary Education Teacher Training** BACHELOR'S DEGREE ADDITIONAL COURSES *University of Oslo*
1999 – 2000	**IT Candidate** Object Oriented Programming. *The Business Academy, Oslo*
1987 – 1996	**Candidatus Magisterii** OLD GRADE BETWEEN BACHELOR AND MASTER Mathematics, Computer Science, Japanese. *University of Oslo*

EMPLOYMENT HISTORY
